

**AMENDMENTS TO THE CLAIMS**

1. (original): A microarray reaction device, which device comprises:
  - a) a microarray chip comprising a plurality of microarray areas; and
  - b) a cover comprising a plurality of projections and a supporting structure;

wherein a plurality of reaction spaces are formed between said microarray areas of said microarray chip and said projections of said cover, and the volumes of said reaction spaces are substantially identical and controllable by the height of said supporting structure and the areas of said projections.

2. (original): The microarray reaction device of claim 1, wherein the microarray chip is a slide.

3. (original): The microarray reaction device of claim 1, wherein the microarray chip further comprises an enclosure to form a plurality of separated microarray areas on the microarray chip and to form a plurality of separated reaction spaces.

4. (original): The microarray reaction device of claim 3, wherein the thickness of the enclosure ranges from about 0.05mm to about 50mm.

5. (original): The microarray reaction device of claim 3, wherein the enclosure has a shape selected from the group consisting of a square, a rectangle, a circle, an ellipse, an oval and an irregular shape.

6. (original): The microarray reaction device of claim 1, wherein the cover further comprises a through-hole to deliver fluid into the plurality of reaction spaces.

7. (original): The microarray reaction device of claim 6, wherein the number of the through-holes ranges from about 1 to about 2,500.

8. (original): The microarray reaction device of claim 6, which has identical or different number of the through-holes and the projections.

9. (original): The microarray reaction device of claim 6, wherein the transverse cross-section of the through-holes has a shape selected from the group consisting of a square, a rectangle, a circle, an ellipse, an oval and an irregular shape.

10. (original): The microarray reaction device of claim 6, wherein the through-holes have a diameter ranging from about 0.01 mm to about 100 mm.

11. (original): The microarray reaction device of claim 1, wherein the number of the projections and/or the microarray areas ranges from about 2 to about 2,500.

12. (original): The microarray reaction device of claim 1, which has identical or different number of the projections and the microarray areas.

13. (original): The microarray reaction device of claim 1, wherein the projections and the microarray areas have identical or different shape(s) and/or surface area(s).

14. (original): The microarray reaction device of claim 1, wherein the height of the projections ranges from 0.01mm to 50mm.

15. (original): The microarray reaction device of claim 1, wherein the surface of the projections has a shape selected from the group consisting of a square, a rectangle, a circle, an ellipse, an oval and an irregular shape.

16. (original): The microarray reaction device of claim 1, wherein the surface of the projections has an area ranging from about 0.01 mm<sup>2</sup> to about 600 mm<sup>2</sup>.

17. (original): The microarray reaction device of claim 1, wherein the plurality of reaction spaces have a height ranging from about 0.001 mm to about 1 mm.

18. (original): The microarray reaction device of claim 1, wherein the plurality of reaction spaces have a volume ranging from about 0.01 mm<sup>3</sup> to about 600 mm<sup>3</sup>.

19. (original): The microarray reaction device of claim 3, wherein the microarray chip, the enclosure, and/or the cover comprises a material selected from the group consisting of a silicon, a plastic, a glass, a ceramic, a rubber, a metal, a polymer, a paper and a combination thereof.

20. (original): The microarray reaction device of claim 1, wherein the cover comprises a plastic.

21. (original): The microarray reaction device of claim 20, wherein the cover is injection molded.

22. (original): The microarray reaction device of claim 20, wherein the plastic is selected from the group consisting of polycarbonate, methylmethacrylate, polystyrene, acrylonitrile-butadiene-styrene (ABS), polyethylene and polypropylene.

23. (original): The microarray reaction device of claim 1, wherein the cover comprises a glass.

24. (original): The microarray reaction device of claim 23, wherein the cover is fabricated by a method selected from the group consisting of gluing, dicing/cutting, slicing, anodic bonding, ultrasonic welding, and a combination thereof.

25. (currently amended): The microarray reaction device of claim 3, wherein the enclosure ~~comprises~~ comprises a rubber attached to a double-coated tape.

26. (original): The microarray reaction device of claim 25, wherein the enclosure is fabricated by stamping.

27. (original): The microarray reaction device of claim 25, wherein the rubber is selected from the group consisting of silicone, caoutchouc, butyl, urethane and neoprene.

28. (currently amended): The microarray reaction device of claim 3, wherein the enclosure ~~comprises~~ comprises a single coated tape.

29. (original): The microarray reaction device of claim 28, wherein the enclosure is fabricated by stamping.

30. (original): The microarray reaction device of claim 1, wherein a reactant capable of binding to an analyte is immobilized in a microarray area.

31-54. (canceled)

55. (original): A microarray reaction device, which device comprises:

- a) a microarray chip comprising a microarray area;
- b) a cover comprising a projection and a supporting structure; and

wherein a reaction space is formed between said microarray area of said microarray chip and said projection of said cover, and the volumes of said reaction space is controllable by the height of said supporting structure and the area of said projection.

56-58. (canceled)
